Hunan Petfessor Pet Product Co.,Ltd.

Directory

Our story:

Our founder Simon, is a pet lover. He had a dog named Max who has been with him for 7 years and they are always supporting each other like family. In an accidental situation, Simon needed to take a business trip so he sent Max to a pet daycare center, where Max died unexpectedly due to an unknown virus infection. This incident hit Simon a lot,and he began to pay close attention to pet health issues. He found that people in the industry spend far more on marketing than the product itself, and many factories do not have relevant certifications for their products, which worries him. Since then, he has been determined to devote himself to the pet supplies industry, hoping to provide a safe, healthy and happy environment for all pets to avoid the same tragedy from happening again.
 Therefore, Simon contacted a professor friend at South China Agricultural University and decided to cooperate in scientific research on related pet products. And then we started factory production and established our own pet base.
After more than ten years of development, we have established a complete production line, including pet feeding, cleaning and grooming, entertainment, and other daily necessities. We have an innovative R&D team, professional consulting team, strict QA & QC procedure, and fast delivery services. All our products have CE, FCC, ROHS certificates.
Now, we have become the leading one-stop pet supplies solution expert in China.

Standardized workshop

1 38 Production Lines - 400,000 units of monthly capacity.

2 Assembly Shop- strictly enforce production standards and quality control

3 3000 Square meter warehouse -delivery in time

Patch technology

1 Circuit Detector-VCTA-A410
Carefully inspect each item to ensure the high quality of the product

2 Patch Machine-G5
Patch-Post Welding-Quality inspection

3 Recent Employees:
100
Engineering Team team: 11 engineers

Injection molding

1 Injection Department

Material incoming inspection

2 8 sets Injection Machine

**3** FDA material and steady production capacity

Laboratory

| Digital Power Meter	Humidity Machine	Mobile Phone Button Life Testing Machine
Rubber Alcohol Abrasion Tester	Vibration Box Testing Machine	Wire Bending Life Tester

Factory Audit

Smart Solutions For Pet Supplies

A user is on a business or holiday trip

A user is asked to take a short business trip, or the user plans to travel during the holiday. Can the pets get fresh and sufficient food while the user is away? Tuya's smart pet feeder solutions enable the user to set the feeding schedule and portion to provide sufficient fresh food for their pets every day.

A user is busy at work

Sometimes a user may want more sleep or have to stay out late at night, but they do not want their pets to starve. With functions such as real-time reminders for the portion in the dish or bucket, regular food supplies and manual food replenishments, the user can be assured that their pets will be fed with their favorite food at the scheduled time.
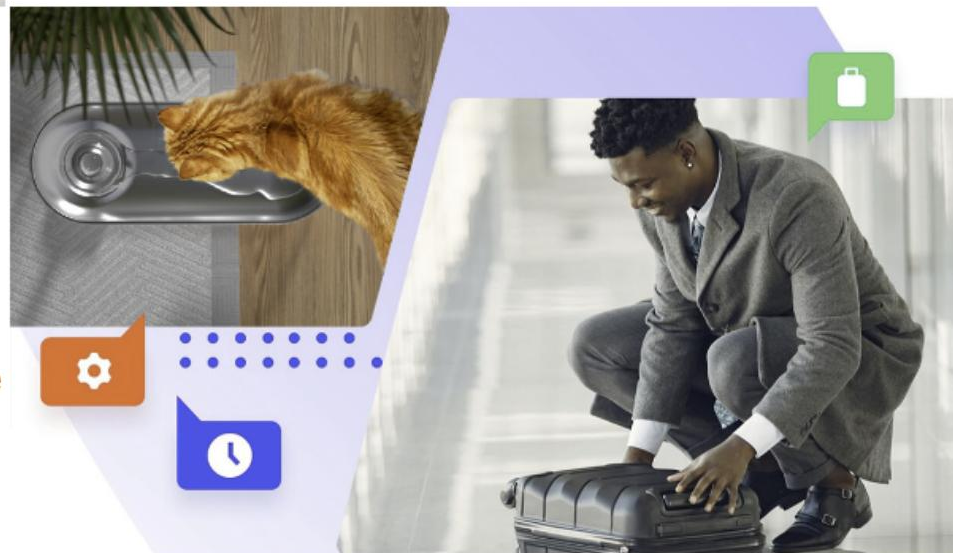

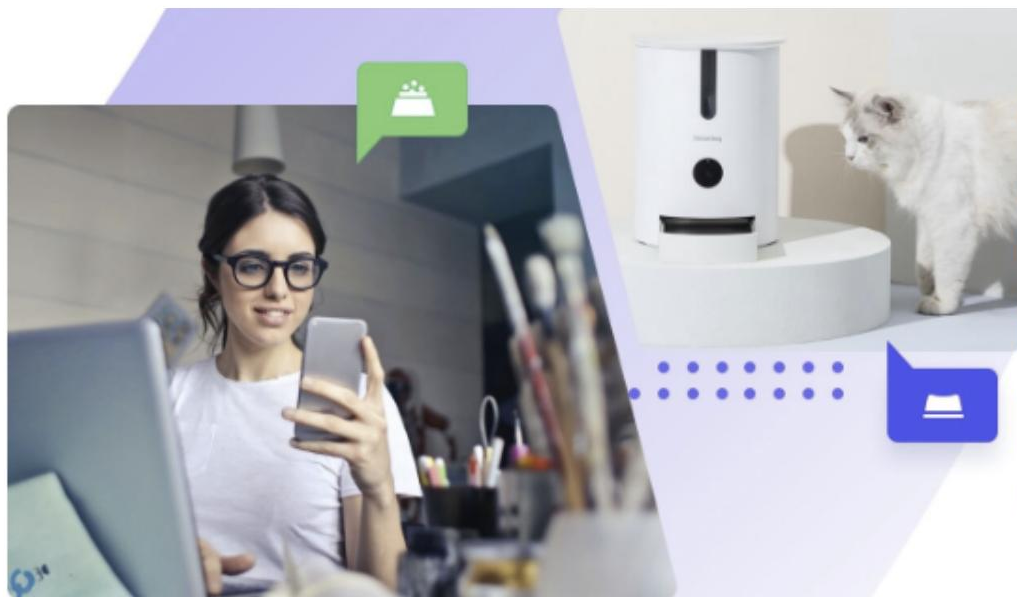

A pet eats too much or too little

What if a pet is too fat because it eats too much, or too skinny due to irregular diets? Tuya's smart pet feeder solutions enable users to make a scientific feeding plan based on their pets' physiological conditions and record the pets' eating habits for further adjustment.Tuya's smart pet feeder solutions enable the user to set the feeding schedule and portion to provide sufficient fresh food for their pets every day.

Solution Benefits

✓ **Low-cost hardware development**

Tuya provides standard open-source hardware solutions and hardware design references to largely reduce hardware development costs. Supported by a plug-and-play network module, a smart product can be developed with only a little portion of coding in the MCU. Manufacturers can complete firmware development for their hardware products through online visual configuration without any programming experience.

✓ **Efficient panel design**

Tuya provides all-in-one app panel solutions. It can be used directly without development from scratch. Tuya also provides a powerful panel studio, on which you can design the layout, style, and interaction methods of your app's control panel based on the product features.

Solution Functions

Regular and fixed-portion feeding

A feeding plan can be customized on the app panel for regular and fixed-portion feeding, making pet feeding easier.

Local feeding plan

The feeding plan can be saved in the pet feeder, so that even if there is a network disconnection, the food will be supplied and fed to the pet as usual.

Statistics of feeding results

Users can check the feeding history and make a statistical analysis of the previous feeding portion on the app panel, to determine whether their pets are healthy.

Weighing food left in the bucket or dish

The food left in the bucket or dish is measured and monitored, so that users know immediately when they need to make replenishments.

Playing the users voice recordings when feeding the pets

Users can record their voices with the pet feeder, so that the pet feeder can play their voices to draw their pets' attention when feeding them.

Reminder push

The pet feeder promptly sends a message to the user when a specified event occurs. For example, the user may want the pet feeder to send a notification when is clogged, the food storage is low, or when it feeds the pets.

Smart Interactive Toys

Cat Laser Toys:

Surface technology: matte+polishing

Function: funnyinteractionwith pets

Laser tag: Built-ininfrared laserprobe,youcanplaywith your pet anytime,anywhere

Lasercontrol: Support manualand automatic360°control th elaserred spots to havemorefunwith pets.

AtmosphereLamp: SevenColorAtmosphereLamp,you canchooseyourfavoritelight color

Smart Interactive Toys

Pet Interacive Toys:

Control mode: Button Control

Intelligent obstacle avoidance: when encountering an obstacle, the motor stops for a period of time and then reverses to realize the function of obstacle avoidance.

Interactive Mode: support two types speed regulation, random actions such as forward, backward, swing, and turn around.

Sound Play: Play three kinds of sounds randomly when working.

Vacuum Storage Container

Capacity: 12L

Material: ABS

Network Connection:Bluetooth

Note:app control-please keep the container and phone within 10 meters

 Control method: mobile APP

Function: vacuum seal to prevent grain deterioration Button Function: 3 buttons (power, lock, unlock)

Power supply mode: rechargeable lithium battery power supply

Abnormal Remind: 20% low voltage and vacuum failure

Charging Interface: type-c interface

Features:

Large Capacity

Muti-Use

App Remote Control

Resist Moisture Deterioration

Why Choose Us?

-Support OEM/ODM Design

Just provide your idea and required specifications,we will make it and then open new mold, let your idea come true.(Protect all information, non-disclosure on new design)

-Independently develop new products

8~10 new products are launched every year to ensure that our customers have different design and new product to choose and sell.

Patent

-All of our products has a patent certification.

-Provide helpful advice for customer on patents
